---

#### UTILITY MANAGEMENT ANALYST III

The Missouri Public Service Commission is accepting applications for the position of Utility Management Analyst III in our Jefferson City office. This highly responsible position requires application of administrative and technical knowledge and skills in supervising, planning, organizing and performing operational audits to improve the efficiency and effectiveness of electric, gas, telephone, water and sewer utilities. The position is responsible for the review of management processes and practices of investor-owned utilities located in Missouri and for the development of supported recommendations to improve future utility operational and financial performance. Also responsible for conducting special studies, preparing audit reports, providing written and oral testimony and performing implementation reviews to document company progress in bringing about recommended changes. Some travel is required.

**QUALIFICATIONS:** Bachelor's degree in finance, accounting, economics, business or public administration, industrial engineering, industrial psychology or closely related field. Four years experience in operational auditing/utility operations required, with at least two years of management analysis work preferred. Personal computer experience utilizing Microsoft Word and Excel software is required. PowerPoint experience is preferred. Must have strong inter-personal skills, be able to work within time constraints and with a diverse group of professional staff.

Starting salary range: \$37,812 – \$42,756. Send resume, application and one to two page writing sample by **April 29, 2006** to: MO Public Service Commission, **Reference Number US020406**, P.O. Box 360, Jefferson City, Missouri 65102.

**An Equal Opportunity Employer M/F/D/V**
